15075 Cable tray length

Overview

MR15075 Residential and Small Business Installation Materials and System Installation Systems Cable Management Systems MR15075 Alibaba.com: HUAYI XKCT-1507.

Key Takeaways

The standard length of the cable tray 15075 is 3 meters (approximately 10 feet). The MR15075 cable tray from Schneider Electric is a straight reduce PVC tray that transitions from 150mm to 75mm in width. While the product page does not explicitly list the length, most cable trays in industrial and commercial applications are manufactured in 3-meter segments, which is a common standard for ease of transport, installation, and modular assembly.

This length allows the tray to cover long distances efficiently while remaining manageable for handling by two people.

Additional Specifications

Width: 150mm reducing to 75mmDepth/Sidewall Height: Typically 25mm for this type of tray Material: PVC (for MR15075) or zinc magnesium steel for similar models Usage: Suitable for power and data cables, ensuring proper ventilation and heat dissipationPractical ConsiderationsWhen planning installation, it is recommended to: Verify support spacing: Standard cable trays require supports at regular intervals to prevent sagging. Allow for expansion: Modular 3-meter lengths can be joined with couplers or fittings to accommodate longer runs. Maintain fill limits: Only fill trays to about 40% of their capacity to ensure proper airflow and prevent overheating.
