Cable Tray Tensile Testing Machine

Overview

This is an automatic wire crimp pull tester, which is designed to measure tensile strength of components up to 3000N. ○ Function: peak force, non-destructive test, UL test values for pull out. These machines are widely used across manufacturing, construction, aerospace, and. The universal testing machine inspekt H-L 600kN was developed as a horizontal material testing system for testing products with high strengths and measurement lengths, such as chains, cables, wires or finished products with extensive installation lengths. Also carries out elongation tests. Design and production of a horizontal traction machine. Presto is a manufacturer, supplier and exporter of Cable Tensile Testing Machine that is highly demanded by the wire and cable industries due to the high tensile strength, optimal performance, stress-free operation, durability and reasonable price. ○ Motor driven, color touch screen operation, automatic measurement and display of the tension value.

Article Content

Cable Chain Tensile Testing Machines

A cable chain tensile testing machine is an essential tool in modern industrial quality assurance, designed to measure the strength, durability, and elasticity of cable chains under controlled stress

Horizontal tensile testing of cables, wires, chains, etc.

The universal testing machine inspekt H-L 600kN was developed as a horizontal material testing system for testing products with high strengths and

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

Electrical cable tensile testing machine | LF Technologies

The electrical cable tensile testing machine performs tests on cables up to 20 m long with a programmable horizontal tensile force of up to 800 kN, and measures the

Cable testing machine, Cable test machine

Find your cable testing machine easily amongst the 187 products from the leading brands (Haida, Instron, MARK-10, ...) on DirectIndustry, the industry specialist for your professional purchases.

Cable Tensile Testing Machine YH-TT06

It can test the peak tensile force, and can also set the upper limit of tensile force and test time for non-destructive tensile test. With the self-developed test software,

Tensile test: Tensile testing machines | ZwickRoell

A tensile tester, also known as a pull tester or universal testing machine (UTM), is an electromechanical test system that applies a tensile

Cable Tensile Tester

The cable is secured around interchangeable sheaves and a motorized actuator pulls the cable at the desired pull rate up to the programmable tension. The

Tensile Tests

These machines can be configured to provide straight or skewed pulls on ropes, cables, and hardware of all shapes and sizes. These machines can be fitted with multiple sheave sets to allow tensile tests

Cable Tensile Testing Machine WL-LL001

The terminal pull force tester is a sophisticated piece of equipment designed for accurately measuring the pull force required to detach terminals from a variety of connectors. This tester is an essential tool

Horizontal Tensile Testing Equipment For Cable Conductor | VTS-Testing ...

Horizontal Tensile Testing Equipment is mainly used for tensile test of steel wire rope, chain, cable, conductor, shackle, webbing slings, etc.

Recommended Tensile Testers

Some of our tensile testing machines can also be used horizontally for testing long samples such as wire and rope. Our digital tensile testers are supplied with a

Steel Wire Cable Tensile Test Machine

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

Wire Tensile Test Machine,Steel Tensile Tester Elongation testing machine (tensile tester) can be used for various types of steel wire, wire, cable,

Test The Tensile Strength Of Cables To Measure Its

The quality of the cables can be ensured with the help of highly effective cable tensile testing machine. The instrument is very easy to operate and helps to

Cable Industry Testing Equipment Manufacturer

Presto Group provides a wide range of Cable Industry Testing Equipment. We are the supplier of Cable Industry Testing Machines all across the globe.

On the Relation between Strength and Stiffness of Cable Tray

The weakest link in the carrying capacity of the cable tray as well as the issue that needs to pay attention is proposed in the process of design and the test of the cable tray. A reasonable

Digital Tensile Testing Machines | High-Precision Results

Why Digital Tensile Testing Machine? The digital tensile testing machine is necessary for high-precision material testing in industries. It ensures

On the Relation between Strength and Stiffness of

The value of the strength-stiffness ratio is obtainable by means of the finite element method or by the loading test of the cable tray.

Tensile Tests

Tensile Testing TMT has several test machines with tensile capacities ranging from a few pounds to several hundred thousand pounds. All of these machines use servo-controlled hydraulic cylinders to
