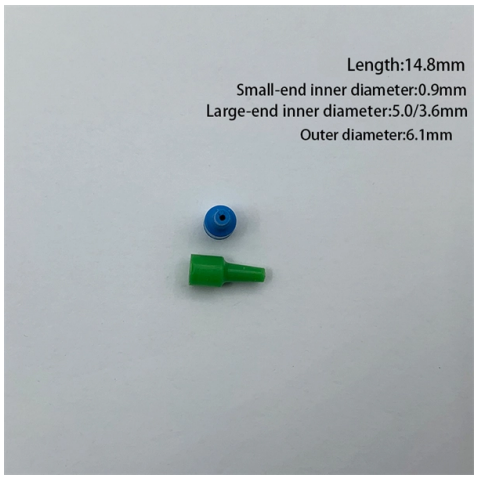
# 40G Interface Aggregation Switch



## Overview

54-Port 10G/40G Enterprise Aggregation Switch Designed with up to 1.44 Tbps of simultaneous high throughput, high port density, 40Gb Ethernet Switches FS 4.

## Frequently Asked Questions

### What are the port densities and speeds of the QFX5100 line?

Juniper QFX5100 switches are available in the following port configurations:72 x 10GbE in a 1 U platform96 x 10GbE in a 2 U platform32 x 40GbE in a...

### What is the throughput of the QFX5100?

QFX5100 switches can deliver up to 2.56 Tbps of bidirectional throughput.

### What are the top features of the QFX5100 line?

Three key features are described below.In-service software upgrades: With its Intel core processor, the QFX5100 allows the Junos operating system t...

### Who should use QFX5100 switches?

The QFX5100 line of access and aggregation switches is ideally suited for leaf deployments in next-generation IP fabrics. Offering an advanced Laye...

### What QFX5100 models are available?

The QFX5100 line includes several compact 1 U models and a 2 U option, each providing wire-speed packet performance, very low latency, and a rich s...

## Article Content

40Gb Ethernet Switches

FS 40Gb Switches offer high bandwidth, network virtualization, and redundancy, ensuring efficient deployment for campus core and distributed networks.

QFX5100 Series 10/25/40/100GbE Switches

QFX5100 access and aggregation switches are designed for the most demanding, high-performance data center deployments. They feature topology-independent

SX1036: The Ideal 40GbE Aggregation Switch

Small data centers typically use a single switch as the aggregation switch for several racks. Most available top-of-rack (ToR) 40GbE switches use four ports of 40GbE as the uplink toward

Products

NSS5810 series switch can be used as L3 aggregation devices on large-sized campus networks. They can also be used as core devices on small and medium

MS425 SERIES

The Cisco Meraki 425 series extends cloud management across the aggregation layer for medium-size networks with our 10/40G fiber aggregation switches.

How To Configure Interface Splitting And Aggregate On DELL

The QSFP interface is in aggregated mode in the initial state of the device interfaces, when checking the interface, only one independent interface is visible, with a default speed of 100G,

Aggregation 10G/40G Switch MES5448

MES5448 switches are high performance devices with 10GBASE-R and 40GBASE-SR4/LR4 interfaces that can be used as aggregation or transport switches in carrier networks and as Top-of-Rack or End

DATA SHEET 40G Advanced Aggregator System

Aggregating and Load Balancing DATA SHEET The AA40G24AC is a purpose built network aggregator, designed for use in top-of. rack applications or at the network edge. The system can be used to

H3C S6526XE-EI Series Advanced Aggregation 10GE Switches

*© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved*

H3C S6526XE-EI series switches Industry-leading high performance and scalable 10GE access switching solution with modular dual power, fixed or modular uplinks (10GE/25GE/40GE/100GE) and

NSS5810 Series L3 Aggregation Switch Datasheet

NSS5810 series switch can be used as L3 aggregation devices on large-sized campus networks. They can also be used as core devices on small and medium-sized campus networks. The switches help

NSS4330 Series L3 Aggregation Switch Datasheet

Product Overview NSS4330 series switch is a high-performance stackable L3 aggregation routing switch developed by Maipu. It is applied in enterprise campus network and easy to deploy Layer3 switching

40G AE (Aggregated Ethernet) on ACX series : r/Juniper

Link aggregation doesn''t allow you to have one stream of traffic going faster than a single interface in the group. It simply load balances incoming streams across the different links. You would need a bunch

NSS4330 Series L3 1G/10G/40G Aggregation Switch Datasheet

Overview NSS4330 series enhanced 1G/10G/40Gigabit L3 aggregation switch is a new-generation multi-service high-performance Ethernet switching product developed by Maipu for the enterprise market.

What Is an Aggregation Switch and How to Choose?

An aggregation switch is a network device that consolidates traffic from multiple access switches, wireless access points, or other edge devices and

How To Configure Interface Breakout And Aggregate On Huawei

The QSFP optical interfaces of the switch can typically be configured as independent interfaces or breakout into multiple interfaces. For example, a 40G interface can be broken out into

40G Fiber LAN over Fiber Switch

By bonding those ports together through link aggregation (physically connected by a 4-strand pre-terminated fiber optic cable), a total throughput of 40G can be achieved between two fiber

Link aggregation

Link aggregation between a switch and a server In computer networking, link aggregation is the combining (aggregating) of multiple network connections in

*© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved*

MS400 Series Aggregation Switches

INDUSTRY-LEADING CLOUD MANAGEMENT The Cisco Meraki MS400 Series brings powerful cloud-managed switching to the aggregation layer. This range of 1 and 10Gbps fiber aggregation switches
