4G Module Optical Stability G610

Overview

The G610 module meets industrial-grade demands and its production and manufacturing fully conform to ISO/TS16949 certification. It can adapt to severe working environments with high temperatures, high humidity, and electromagnetic interference. This document contains information highly confidential to Shenzhen G&T Industrial Development Co. Fibocom offers this information as a service to its customers, to support application and engineering. The SFP+ ports are capable of auto-negotiating to 4, 8, 16, or 32G speeds depending on the SFP+ model and the minimum supported speed of the optical transceiver at the other end of the link. 4G, 8G, and 16G performance are enabled by 16G SFP+ transceivers if the other end of the connection has a. Brocade offers the SFP-FC16G-SW Fibre Channel optical module, with the part number 57-0000088-01. The Brocade 57-0000088-01 module is a multi-rate Fibre Channel transceiver that supports 16G, 8G. FIBOCOM G610 modules are designed based on the application traits of portable products. They have low power consumption, are small in size, and they adopt an LCC package. Connectors are omitted for the convenience of bulk processing, thus helping customers reduce the total cost of terminals.
