Azerbaijan spliced optical cable

Overview

The Trans-Caspian Fiber Optic Cable is a backbone fiber-optic cable between the Republic of Azerbaijan and the Central Asian Republics through the bottom of the Caspian Sea, being an Asian part of the mega Digital Silk Way project, and creating a digital telecommunications corridor. The Trans-Caspian Fiber Optic Cable is a backbone fiber-optic cable between the Republic of Azerbaijan and the Central Asian Republics through the bottom of the Caspian Sea, being an Asian part of the mega Digital Silk Way project, and creating a digital telecommunications corridor. Initiated by NEQSOL Holding and implemented through its subsidiary AzerTelecom, the Digital Silk Way is a large-scale digital infrastructure project designed to build a high-capacity transit fiber-optic network linking Europe with Central and South Asian markets / Digital Silkway The Trans-Caspian. The Trans-Caspian Fiber Optic Cable is a backbone fiber-optic cable between the Republic of Azerbaijan and the Central Asian Republics through the bottom of the Caspian Sea, being an Asian part of the mega Digital Silk Way project, and creating a digital telecommunications corridor between Europe. The plant manufactures cables and electrical equipment using modern technologies and production processes that comply with international standards. STP Global Cable, operating since 2009, is one of the largest cable manufacturers in the region. The plant produces a wide range of cables, including. The Caspian Sea, long a symbol of regional cooperation, is set to become a digital bridge between the continents. For the first time, a subsea fiber-optic cable will link Azerbaijan and Kazakhstan, forming a digital artery with more than 400 terabits of capacity, poised to transform data routes. Since 2011, Maybo has represented industry leaders including Fluke, Trimble, Anritsu, Keysight, Megger, FLIR, Fujikura, Tektronix and Olympus. The Trans-Caspian Fiber Optic Cable Line Project is being.
