Automatic glue application for fiber optic patch cord curing

Overview

Automatic fiber optic glue injection machine for Patch It fit for any non planar 3D injection path. It used for injecting glue to ceramic ferrule. The mach.

Key Takeaways

Automatic glue dispensing machines enable precise, high-speed epoxy application and curing for fiber optic patch cord ferrules, improving efficiency and consistency in production.

Overview of Automatic Glue Dispensing Machines

Automatic glue application machines are designed to inject epoxy or adhesive into the ferrules of fiber optic connectors with minimal human intervention. These machines are widely used in patch cord production lines to ensure consistent glue volume, precise placement, and high throughput. They typically feature 3-axis manipulators that allow for accurate positioning of the fiber and ferrule, supporting SC, LC, FC, ST, MU, and E2000 connector types.

Key Features

High Precision and Speed: Machines can process thousands of cores per hour (e.g., 3,600–20,000 cores in 8 hours) with stable glue content and minimal waste. Automation and Ease of Use: Many models operate independently without external computers, using graphical touch screens for path programming, matrix copying, offset adjustments, and calibration point settings. Needle Control and Interpolation: Sophisticated control systems allow precise needle movement for non-planar 3D injection paths, ensuring uniform epoxy distribution in ceramic ferrules.

Program Transfer: Injection programs can be copied and transferred between machines, facilitating scalability in large production environments. Compatibility: Machines are suitable for various connector types and ferrule materials, including ceramic ferrules, and can be integrated into fully automated patch cord production lines.

Curing Process

After glue injection, curing is typically performed using specialized ovens or curing stations. These ovens maintain stable and uniform temperatures across all heating blocks, ensuring the epoxy hardens consistently without introducing stress or misalignment in the fiber. Some systems, like the AccuCure™, use PID microprocessor technology to achieve precise temperature control, which is critical for maintaining low insertion loss and high return loss in the finished patch cords.

Benefits

Consistency: Automated dispensing ensures uniform glue volume and placement, reducing variability in connector performance. Efficiency: High-speed operation reduces labor requirements and increases production throughput. Quality Control: Integration with curing ovens and inspection equipment ensures reliable optical performance.

Flexibility: Machines can be programmed for different connector types and production batches, supporting both small and large-scale manufacturing. Automatic glue application and curing systems are essential for modern fiber optic patch cord manufacturing, providing precision, speed, and repeatability that manual processes cannot match.

Article Content

Automatic fiber optic glue injection machine for Patch

It fit for any non planar 3D injection path. It used for injecting glue to ceramic ferrule. The machine has needle controlling button. No necessary to connect with

Epoxy Dispense Fiber Patch Cord Manufacturing Machine

Automatic Optical Fiber patch cord epoxy injection machine specially designed for mass fiber optic patch cord production. special designed 1.25mm and 2.5mm holding jig for precise epoxy

How to use automatic fiber optic patch cord epoxy injection machine

Wirenet''s staff will show you How to install and use the automatic glue injection machine to automaticly produce fiber optic patch cord.

Automatic fiber optic epoxy injection machine for patch

Automatic Optical Fiber patch cord epoxy injection machine specially designed for mass fiber optic patch cord production. special designed 1.25 mm and 2.5 mm

Fiber Optic Cable Glue: A Manufacturer''s Guide to Incure Adhesives

This blog post will explore the unique demands of fiber optic bonding, outline the types of adhesives used, and demonstrate how Incure provides cutting-edge, UV-curable solutions to

Fiber Patch Cord Manufacturing Machine manufacturer from china

Buy factory price Fiber Patch Cord Manufacturing Machine, Automatic Fiber Patch Cord Manufacturing Machine manufacturer from China.

Automatic Glue Dispensing Machine for Fiber Optic Equipment

Automatic Glue Dispensing Machine for Fiber Optic Equipment (HK-G100) offers precise glue application, white color, and 2-year warranty. Ideal for patch cord factories.| Alibaba

Adhesives for Fiber Optic Applications | MasterBond

Master Bond offers an extensive line of epoxies and UV curing systems for use in fiber optics devices. These products provide superior bonding strength and

SC / LC / FC Fiber Patch Cord Making Machine Auto

it mainly is used for dispensing glue to ferrule of SC/LC/FC, fast speed (3600PCS/H),a strong content consistency of dispensing and stable content,

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

Automatic Fiber Patch Cord Manufacturing Machine

For the technical problems encountered in the production of optical fiber connectors, there are good solutions, I hope to help partners! Shenzhen Chuanglixun Optoelectronic Equipment Co., Ltd. is

Tools & Equipment for Fiber Optic Patch Cord Production

Explore essential tools and equipment for producing high-quality fiber optic patch cords — from curing ovens to polish machines and end-face detectors.

gpt4_vocab_list/o200k_base_vocab_list.txt at main

Vocabulary list of GPT-4o (o200k_base) and GPT-4/GPT-3.5 (cl100k_base) tokenizers. Special tokens are excluded. - kaisugi/gpt4_vocab_list

Advanced Composite Patch Cord Making Machine with MT Ferrule for ...

This horizontal type fiber optic curing oven is designed for curing MT ferrule or assembled SC/FC/ST/LC/MU/SMA905 connector''s epoxy, and can also curing 2.50mm/1.25mm/3.17mm bare

Epoxy Dispense Fiber Patch Cord Manufacturing Machine

High efficiency glue dispensing machine fiber optic patch cord production machine for epoxy dispense Model:CLX-DJ02 Place of Origin:ShenZhen,China Description Automatic Optical Fiber patch cord
