Cable Terminal Box Connection Method

Overview

Acceptable methods of connection include compression lugs (both me-chanical and crimp type) or split bolts. Not acceptable are connections that use only solder or twist-on connectors (wire nuts) [See NFPA 79-2012 Electrical Standard for Industrial Machinery, Na-tional Fire Protection Association. The cable connection method uses cables as the medium for electrical connection to transmit electrical energy from the outdoor electrical distribution box to various electrical equipment.
