Cable tray reserved for wires

Overview

A cable tray is an organized support structure designed to secure and route these insulated electrical cables. It acts as a dedicated pathway for power distribution and data transmission, often supporting cables hidden behind walls or above ceilings. Are you looking for high-quality Cable Trays for improved cable management and organisation?

Look no further than our extensive range, featuring top brands such as our very own RS PRO, Cablofil International, Legrand, and StarTech. But if you don't use these “roads” properly, you run into trouble. Think about it: Messy wires can cause interference, making signals weak. What is Cable Tray Systems?

An electrical cable tray is a type of containment system used to support insulated electrical. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia.
