Distribution box height from the ground

Overview

Follow height rules when installing a distribution box. Wall-mounted boxes should be 4. This height also safeguards the box from potential. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. However, this height can be adjusted higher or lower appropriately for operational and maintenance convenience, provided design. Outdoor receptacles should be installed at the front and rear of the house at a maximum height of 6 ½ feet above grade.
