Conventional Branch Optical Cable

Overview

This type of optical cable is aimed to be used for voice, data, broadband and CATV transmission in Long Distance, Backbone, Local Area, FTTx and Metro Networks with Direct Burial, Duct and Lashed Aerial installation methods. PROBLEM TO BE SOLVED: To provide an optical branch cable capable of reducing the wiring work amount of an optical fiber cable wired to a building such as a building or a condominium and reducing the wiring cost, and a wiring method thereof. They also suitable for additional installation into a duct already occupied with other cables, owing to small cable size, ultra low friction jacket and preferable rigidness. All our FTTx cable is RoHS. Executive Summary: Fiber optic cable selection is not one decision — it is a chain of six interdependent choices: single-mode or multimode, which OM/OS grade, tight-buffer or loose-tube construction, which jacket rating, which connector type, and whether to armor. The optical fiber elements are typically.
