Fundamentals of Fibre Channel

With the fabric topology, many connections can be alert at a time. The any-to-any connection service and peer-peer communication service provided by

FC connector

The FC connector is a fiber-optic connector with a threaded body, which was designed for use in high-vibration environments. It is commonly used with both single-mode optical fiber and polarization-maintaining optical fiber. FC connectors are used in datacom, telecommunications, measurement equipment, and single-mode lasers. They are becoming less common, displaced by SC and LC connectors. The FC connector h
