Single mode and multimode pin exchangers ensure required pin configuration. Fiber optic tools and. There are two primary reasons why an SFP module might become stuck in a port: The SFP is wedged in the cage: This can occur due to slight size variations, dirt or debris, or even heat expansion. A defective latching mechanism prevents proper release: This might happen if the latch handle is broken. Our fiber optic termination kits, inspection tools, and cleaning supplies allow both lab and field technicians to complete reliable assembly of fiber optic systems. Our termination kits, for example, are equipped with all of the necessary tools — pin and socket polishing tools, jacket strippers.
