Fiber Coupler

Overview

Dichroic couplers can be used to combine a pump and a signal input for a fiber amplifier, or to remove residual pump light after the amplifier.

Key Takeaways

A fiber coupler is an optical device that splits or combines light between one or more optical fibers, enabling controlled distribution of optical signals.

Definition and Function

A fiber coupler is a device used to couple light from one or several input fibers to one or several output fibers, or from free space into a fiber. It allows light to be split, combined, or redirected with minimal loss, and the power distribution can depend on wavelength and polarization. Couplers are typically directional, meaning light entering an input port does not return to other input ports, and specifications often include return loss to quantify back-reflected light.

Types of Fiber Couplers

Fused Fiber Couplers: Fibers are thermally tapered and fused over a few centimeters, allowing light to transfer between cores. These can be made with single-mode (SM), polarization-maintaining (PM), or multimode (MM) fibers. Planar Lightwave Circuit (PLC) Couplers: Integrated waveguides on a chip, often used for 1x4, 1x8, or 1x16 splitting in telecommunication networks.

Pump Combiners: Used in fiber lasers to combine pump light with signal fibers, typically with multimode fibers. Dichroic Couplers: Combine or split light based on wavelength, useful in wavelength-division multiplexing (WDM). Bulk Optics Couplers: Use microlenses or beam splitters coupled to fibers (“fiber pig-tailed”).

Key Specifications

Coupling Ratio: Percentage of input power delivered to each output port; may vary with wavelength. Insertion Loss: Total optical power loss from input to output. Polarization Dependent Loss (PDL): Variation in transmission due to polarization states.

Directivity: Fraction of input light lost in internally terminated ports, related to optical return loss (ORL). Bandwidth: Couplers can be standard (narrowband), broadband, or dual-window for multiple wavelength bands.

Applications

Fiber couplers are widely used in: Telecommunications: Splitting or combining signals in fiber networks. Fiber Lasers and Amplifiers: Pump-signal combination. Optical Sensing: Distributing light to multiple sensors.

Laboratory Experiments: Controlled splitting of light for interferometry or OCT (optical coherence tomography).

Commercial Options

Thorlabs offers a variety of SM, PM, MM, and double-clad couplers, as well as PLC splitters and WDMs suitable for OCT and telecommunication applications. Amazon provides LC, SC, and ST fiber couplers for network connectivity, often pre-cleaned and designed for low insertion loss. Fiber couplers are essential components in fiber-optic systems, providing flexibility in routing, splitting, and combining optical signals with high precision and minimal loss.

Fused Fiber Optic Couplers / Splitters

Thorlabs offers a varied selection of single mode (SM), polarization-maintaining (PM), multimode (MM), and double-clad fiber couplers, as well as 1x8 and 1x16

Fiber Coupler Tutorials

The coupling ratio is calculated from the measured insertion loss. Coupling ratio (in %) is the ratio of the optical power from each output port (ports 2 and 3) to the

Tutorial Passive Fiber Optics, Part 8: Fiber Couplers

Dichroic couplers can be used to combine a pump and a signal input for a fiber amplifier, or to remove residual pump light after the amplifier. For high-power

What is a Fiber Coupler and How Does It Work?

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

In summary, a Fiber Coupler is a vital optical component in fiber optic systems, enabling the transfer of light signals between different fibers or from

Fiber Couplers/Splitters/Combiners

We offer a full line of fiber optic couplers and splitters supporting SM, MM, PM, large core, and double-clad fibers across 300–2000 nm, with power handling up to 100 W and operating temperatures up to

What Is Fiber Optic Coupler?

Learn what a fiber optic coupler is, how it connects and divides fiber ends, and what types and specifications are available. Compare passive and active couplers, splitters, combiners, X

Fiber Couplers / Collimators by series

All fiber couplers and fiber collimators have an adjustable focus and are available for different connector types (including FC connectors FC PC, FC APC as well as

Multimode Fiber Optic Couplers

Newport''s Fiber Optic Coupler family has been developed using fused fiber technology. These multimode fiber optic couplers allow bi-directional coupling

1x8 Single Mode Fiber Optic Splitters

In contrast to fused fiber couplers, where light is coupled from one fiber core to the other, these devices operate as a continuous waveguide that splits the propagating signals. Refer to the 1x8 Splitter

1x4, 1x8 and 1x16 Singlemode Fiber Optic Couplers

The optical fiber couplers allow bi-directional coupling and can be used to either split or combine signals. Newport''s 1x4, 1x8 and 1x16 fiber optic couplers are available with single wavelength, wavelength

Future Trends in Optical Fiber Coupler (Splitter) Market (2026

Recent disruptions in the Optical Fiber Coupler (Splitter) Market, particularly due to COVID-19, have accelerated digitalization, reshaping both market strategies and consumer behaviors.

AZDENT Dental LED Fiber Optic 45° High Speed Handpiece Titanium

AZDENT Dental LED Fiber Optic 45° High Speed Handpiece Titanium Mini Head Four Water Spray / 6 Holes Quick Coupler. Skillful in workmanship, reliable in quality.

StarTech LC to LC Coupler, Single Mode LC Fiber Coupler,

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

StarTech LC to LC Coupler, Single Mode LC Fiber Coupler, LC/UPC Duplex Adapter, Fiber Optic LC Coupler for Patch Panel buy at discounted prices. Great Prices and nationwide delivery available.

StarTech LC to LC Coupler, Single Mode LC Fiber Coupler, LC/UPC

Startech LCLCSMCOUPLER for $13.58 - Startech Lc To Lc Coupler, Single Mode Lc Fiber Coupler, Lc/upc Duplex Adapter, Fiber Optic Lc Coupl at CompSource as of Monday Jul 13, 2026

MPO coupler

Download this free 3D print file designed by Petrakis. Looking for a quick, reliable, and cost-effective way to connect MPO fiber patch cords? I have designed a Simple MPO Fiber Coupler. Whether you are

StarTech MPO/MTP Coupler, Single Mode/Multimode Fiber

StarTech MPO/MTP Coupler, Single Mode/Multimode Fiber Adapter, Key Up-Key Down, Fiber Optic MPO/MTP Coupler - Green buy at discounted prices. Great Prices and nationwide delivery

Go4Fiber Ltd-One Stop Fiber Optic Superstore

1x2 Coupler, 1260nm-1620nm 2x2 Coupler, 1310nm 2x2 Coupler, 1550nm 2x2 Coupler, 1310/1550nm 2x2 Coupler, 1260nm-1620nm 1xN & NxN Coupler/ Splitter, Singlemode 1x4 Coupler, 1310nm 1x4

FC/PC Fiber Connectors: Single Mode and Polarization-Maintaining

Dirt on the fiber tip can result in permanent damage to the fiber connector, which can increase coupling losses or create undesirable mode structures in the output light.
