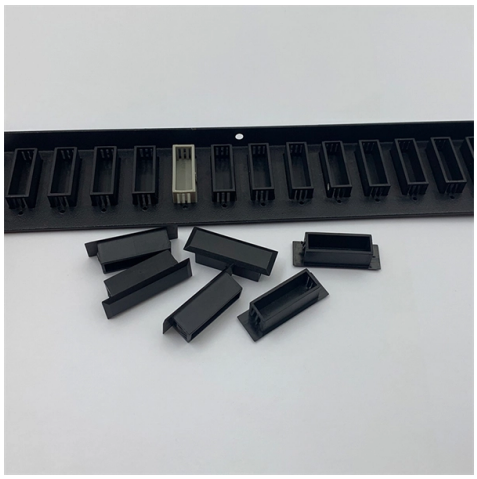
Monaco AOC Active Optical Cable 200G



Overview

It is a kind of Active Optical Cable designed to carry 200 Gbps of data. Often, 200G AOC uses parallel fiber technology (for example, 8×25 Gbps or 4×50 Gbps) inside the cable. In contrast, passive cables do not have such electronics. AOCs are equipped with both an electro-optical conversion chip and an opto-electronic conversion chip, and are used to transmit high-speed signals through optical fibers. We can customize the cable compatibility for major brands like Cisco, Juniper, Arista, Dell, HPE. 200G AOC Cables from JTOPTICS are Active Optical Cables that offer lightweight, flexible, and low-power connectivity. Designed for high-performance computing and networking environments, they enable fast data transfers with reduced electromagnetic interference.
