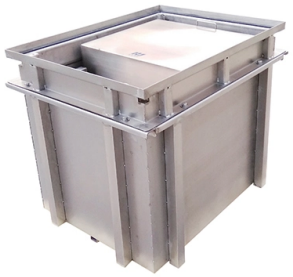
Opgw72 core optical cable



Overview

The 72-core OPGW cable represents a pinnacle of engineering, combining high fiber count with robust mechanical and electrical performance. Aluminum-clad steel and aluminum alloy wires are stranded around the central element in single or multiple layers. Its small profile offers an exceptional solution to the diameter and weight concerns on many of today's overloaded transmission towers where an. The 72-core OPGW cable ensures high bandwidth and reliability for modern power and communication networks. Application OPGW is mainly applied in communication line of newly constructed high voltage transmit electricity system with 35 KV or above, or replacement of existing ground wire of previous overhead high voltage transmit electricity system. ZTT OPGW is mainly divided into: central-type stainless steel tube OPGW, stranded-type stainless steel tube OPGW, al-covered stainless steel tube OPGW, aluminum tube OPGW, lightning resistant central stainless steel tube OPGW with compressed wires and OPPC.
