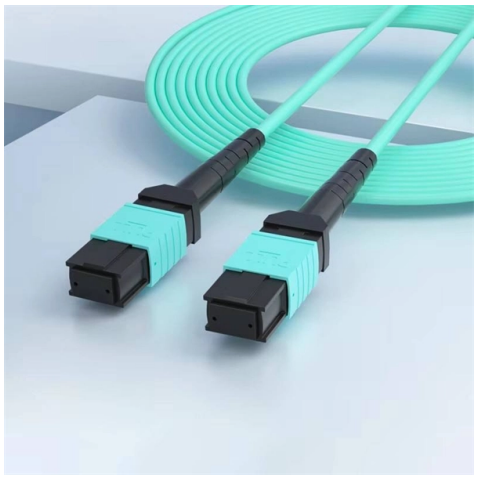
How much does a large-span corrugated cable tray cost



Overview

Cable Tray Price Per Meter: Market Analysis & Cost Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidd.

Key Takeaways

Large-span corrugated cable trays typically range from $50 to $300 per meter, depending on material, width, height, and finish. OverviewLarge-span cable trays are designed for heavy-duty applications with high load capacity, often used in industrial, commercial, and harsh environmental conditions. They are available in ladder, channel, or perforated styles and can be made from stainless steel (304/316), FRP (fiberglass reinforced plastic), or aluminum alloy.

Finishes include pre-galvanized, hot-dipped galvanized, or powder-coated surfaces to resist corrosion and heat damage.

Factors Affecting Price

Material: Stainless steel trays are more expensive than aluminum or FRP due to higher durability and corrosion resistance. Dimensions: Widths range from 200mm to 800mm and heights from 60mm to 150mm; larger trays with higher spans cost more. Load Capacity: Trays designed to carry heavier cables or longer unsupported spans require thicker or reinforced materials, increasing cost.

Finish: Powder-coated or hot-dipped galvanized finishes add to the price compared to standard pre-galvanized trays. Accessories: Installation components like corbels, hangers, bends, and reducers can add 10–20% to the total system cost. Typical Price RangeFRP or aluminum trays: $50–$120 per meterPre-galvanized steel trays: $80–$180 per meterStainless steel 304/316 trays: $150–$300 per meter Prices vary by supplier, order quantity, and regional shipping costs.

For precise pricing, contacting manufacturers or distributors such as Trayco, McMaster-Carr, or EAE Electric is recommended. Additional ConsiderationsLarge-span trays are often supplied in 3-meter or 6-meter lengths, which can affect unit pricing. Custom widths, heights, or finishes may incur additional fabrication costs.

For projects in corrosive or outdoor environments, investing in higher-grade materials like stainless steel or FRP can reduce long-term maintenance costs. By considering these factors, you can estimate the total cost for your project and select the most suitable large-span cable tray system.
