How much does a variable optical attenuator cost

Overview

variable optical attenuator price: Best Deals in 2025The global variable optical attenuator (VOA) market is experiencing steady growth, driven by escalatin.

Key Takeaways

Variable optical attenuators typically cost between $50 and $1,500, depending on type, technology, and specifications.

Price Range Overview

Manual fiber-optic VOAs: Simple mechanical or gap-based VOAs with manual adjustment usually cost $50–$200. These are suitable for basic laboratory setups or low-power optical networks. Electronic or motorized VOAs: VOAs with analog or digital control, including MEMS-based devices, generally range from $200–$1,000.

These allow precise, repeatable attenuation and are used in telecom networks, WDM systems, and automated test setups. High-performance or specialized VOAs: Devices with high dynamic range (up to 60 dB), polarization-maintaining fibers, or multi-channel arrays can cost $1,000–$1,500 or more, depending on manufacturer and configuration.

Factors Affecting Cost

Technology: MEMS, liquid crystal, thermal, or mechanical VOAs differ in complexity, speed, and precision, influencing price. Attenuation range: Higher dynamic range VOAs (e.g., 0–60 dB) are more expensive than standard 0–30 dB devices. Fiber type: Single-mode, multi-mode, or polarization-maintaining fibers affect manufacturing cost and performance.

Control method: Manual VOAs are cheaper, while electronically controlled VOAs with analog or digital interfaces cost more. Application requirements: VOAs for high-power lasers, WDM channel equalization, or precision testing may include additional features, increasing cost. Purchasing OptionsVOAs are available from specialized suppliers like FS.com, OZ Optics, and general marketplaces like Amazon, with prices varying by specifications and quantity.

For bulk or custom configurations, contacting manufacturers directly is recommended to obtain accurate pricing. In summary, VOA costs vary widely based on technology, control type, and performance requirements, with typical prices ranging from $50 for basic manual units to over $1,500 for high-end MEMS or multi-channel devices.

Article Content

variable optical attenuator price: Best Deals in 2025

The global variable optical attenuator (VOA) market is experiencing steady growth, driven by escalating demand in telecommunications, data centers, and research applications.

Variable Optical Attenuator

HeyOptics offers High-quality Variable Optical Attenuator (Singlemode,0-60dB) at direct-factory Price & Life-time Warranty.

Optical Attenuators, Fixed & Variable Available

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.

Variable optical attenuator

Shop high-quality variable optical attenuators from reliable suppliers. Enjoy precision and durability for your fiber optic applications. Bulk orders welcome.

Variable Optical Attenuators – Buyer''s Guide & Suppliers

This buyer''s guide for variable optical attenuators provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

Fiber Optical Variable Attenuators

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

We offer the industry''s most extensive selection of fiber variable optical attenuators (VOAs), addressing all application scenarios with best-in-class performance and value.

Optical Attenuators – Buyer''s Guide & Supplier List | RP Photonics

This buyer''s guide for optical attenuators provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

Optical Variable Attenuator Price

Shop our selection of optical variable attenuator prices. Find reliable, high-quality attenuators for various applications. Wholesale and OEM available.

Attenuators | Authorized Distributor

Shop Arrow for attenuators from leading industry manufacturers including Huber Suhner, Analog Devices, TE Connectivity, Amphenol ICC and more. We have a large selection of fixed, variable,

MEMS Variable Optical Attenuators: Single and Multi-Channel

OZ Optics Ltd. offers MEMS-based variable optical attenuator (VOA) in a fast, low cost miniature package. These best-in-class attenuators are available either as single units or as arrays of

Attenuators

Attenuators from VIAVI offer a complete range of power-balancing options, from fixed to variable optical attenuators in field, lab, and manufacturing environments.

How a Variable Optical Attenuator Works – Principle, Types ...

Learn how variable optical attenuators (VOAs) control optical power. Explore MEMS, LCD, and fiber-bend VOA types, specifications, and applications.

What Is a VOA Variable Optical Attenuator in Fiber Optics?

Learn what a VOA variable optical attenuator is, how it works, and why it is critical for optical modules like SFP and QSFP in fiber networks.

How Does A Variable Optical Attenuator Work?

To summarize, a Variable Optical Attenuator is a crucial device for controlling optical power levels in fiber communication systems. Understanding how does a variable optical attenuator

Fixed vs. Variable Attenuators: Which Is Right for Your Network?

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

Compare fixed vs. variable attenuators for fiber optic networks. Learn the technical differences, ideal use cases, and how to prevent receiver saturation.

Variable Optical Attenuators (VOAs) in DWDM Systems

Variable Optical Attenuators (VOAs) in DWDM Systems A comprehensive technical reference covering VOA operating principles, technology types, placement in EDFA and ROADM

How to Choose a Variable Optical Attenuator

Choose the right GAO Tek''s variable optical attenuator for your needs with our concise guide. Ensure compatibility and efficiency in just a few easy steps.

Variable Fiber Optic Attenuators Types Prices & Technical Specifications

Variable optical test attenuators generally use a variable neutral density filter. Despite relatively high cost, this arrangement has the advantages of being stable, wavelength insensitive, mode insensitive,
