Multimode fiber optic connectors for space stations

Overview

They support both single-mode (SM) and multimode (MM) fibers and are widely used in space-constrained environments requiring high fiber counts. Aerospace engineers have used Amphenol connectors in everything from low Earth orbit (LEO) satellites that make advanced. Multimode Fiber Optic Connectors are available at Mouser Electronics. Military QPL and MCOTS Fiber optic interconnect technologies (MIL-DTL-38999 Type, MIL-DTL-83526 GFOCA Type, MIL-PRF-28876, ARINC 801 and more) deliver high data rate and high bandwidth performance in harsh land, sea, air, space and C4ISR applications. Precision-engineered QPL and commercial fiber. Samtec's SET products are approved for NASA Class D missions that require high-reliability, quick-turn and cost-effective solutions for LEO satellites, SmallSats, CubeSats and other space exploration equipment, such as space suits.
