Nepal power distribution box issue

Overview

According to NEA's Tanahun Distribution Centre, the power supply was disrupted at 5:32 pm on Wednesday after an excessive current flow due to some technical issues in the transformer's earthing system. By focusing on technical and administrative improvements, along with clear decision-making processes, NEA has managed to end the long-standing issue of load shedding, which was officially declared over in the month of Baisakh in the year 2075 BS. DAMAULI, May 21: Power supply was disrupted following a technical issue in a 12 MVA power. The Distribution and Consumer Services Directorate of the Nepal Electricity Authority (NEA) is responsible for ensuring a reliable electricity supply and delivering efficient customer services across the nation.
