WSS product optical module

Overview

Wavelength Selective Switches (WSS) provide agility in optical networks via their ability to reconfigure traffic and enable bandwidth sharing at the optical layer. Molex offers WSS products in Single- and Twin- formats, with port counts ranging from Single 1x2 to Twin 1x32+ products. A WSS comprises a switching array that operates on light that has been dispersed in wavelength without the requirement that the. The TrueFlex® Twin WSS enables the introduction of colorless and directionless wavelength add/drop at optical network nodes. This minimizes provisioning constraints that increase the pre-deployment of capital and slow time-to-service. Built upon industry-leading Lumentum liquid crystal on silicon. Located in Australia, Finisar WSS provides world-class wavelength management components and subsystems, including wavelength selective switches (WSS), to leading networking equipment manufacturers.

Wavelength Selective Switch (WSS) Modules

Wavelength Selective Switches (WSS) provide agility in optical networks via their ability to reconfigure traffic and enable bandwidth sharing at the optical layer.

Wavelength Selective Switches (WSS) Modules | GLSUN

GLSUN''s Wavelength Selective Switch (WSS) module mainly includes specifications such as Single 9D/Twin 20D, with wavelength coverage ranging from 96 to 120 channels in the C-band. It supports

Wavelength selective switching

OverviewWhat is a WSSMicroelectromechanical Mirrors (MEMS)Binary Liquid Crystal (LC)Liquid Crystal on Silicon (LCoS)MEMS ArraysFuture Developments

Wavelength selective switching components are used in WDM optical communications networks to route (switch) signals between optical fibres on a per-wavelength basis.

TrueFlex Twin High Port Count Wavelength Selective

The TrueFlex® Twin WSS enables the introduction of colorless and directionless wavelength add/drop at optical network nodes. This minimizes provisioning

Finisar WSS

Located in Australia, Finisar WSS provides world-class wavelength management components and subsystems, including wavelength selective switches (WSS), to

Twin 2x21 Flexgrid WSS Module-Keptek

Our modules deliver high performance, stability, and precision required for modern optical networks, backed by our deep expertise in LCoS photonics. Control over the entire design and manufacturing

Dual Wavelength Selective Switch (WSS)

By integrating two WSS, each featuring superior optical performance, in a single module the dual WSS modules by Finisar are optimized for this new generation

Wavelength Selective Switch (WSS) Solutions – InLC

High-Performance WSS for ROADM & Optical Circuit Switching. InLC''s WSSs feature the industry''s lowest power consumption, very fast response time and

Single Wavelength Selective Switch (WSS)

Cost-effective deployment of colorless (C) and colorless directionless (CD) ROADMs is facilitated by the introduction of broadcast & select (B&S) ROADM architectures, which, unlike route & select (R&S)

WSS Module Technology for Advanced ROADM

At the heart of advanced ROADM systems lies the Wavelength Selective Switch (WSS) module, a critical technology that facilitates the selective switching of optical wavelengths with high precision

Active Optical Module Market 2025

© 2026 DOLPHIN FIBER SYSTEMS - All rights reserved

While Chinese manufacturers dominate volume production, their American and European counterparts maintain leadership in specialized high-performance modules for mission-critical applications. Active

Lumentum

Lumentum Holdings Inc. (“Lumentum”), a global leader in photonic solutions, today announced its showcase of technology and product demonstrations designed to meet the

10G Single-Mode Optical Module

CLASS 1 LASER PRODUCT, IEC/EN 60825-1:2014 Do not look into the ends of the fiber optic cable or SFP module while converters are powered.

Optical Transceiver Modules Driving AI & Telecom Upgrades

Explore product roadmaps, DSP integration, and telecom modernization accelerating demand for high-speed optical transceiver modules.

Over 20 Million 400G & 800G Datacom Optical Module

BOSTON (January 7, 2025) – Total shipments of leading-edge datacom optical modules are projected to tally over $9 billion for 2024, according to the latest

AI Infrastructure, Secure Networking, and Software

Cisco is a worldwide technology leader powering an inclusive future for all. Learn more about our products, services, solutions, and innovations.

Wavelength Selective Switches (WSS) Modules | GLSUN

Wavelength Selective Switches (WSS) are advanced optical devices designed to dynamically manage individual wavelengths in wavelength division multiplexing (WDM) systems. They enable flexible

WSS Module Technology for Advanced ROADM | NTT

Abstract Wavelength selective switches (WSSs) are the key to implementing advanced reconfigurable optical add/drop multiplexing (ROADM) with colorless-
