Optical Module e2

Overview

XGSPON SFP OLT E2 modules are designed for single fiber BiDi data links, with TX 1577nm EML LD and RX 1270nm APD, Complies with SFP+ MSA - AscentOptics. The XGPON OLT SFP+ transceiver provides an asymmetric 9. 488G upstream, reaching a link up to 20km over SMF via SC/UPC connector. It is fully compliant with ITU-T G. 2 and is ideal for asymmetric 10-Gigabit capable passive optical network (XG-PON) system. Optical modules typically have an electrical interface on the side that connects to the inside of the system and an optical interface on the side that connects to the outside. The HG Genuine PLGS1-98A/98B Transceiver is a high performance, cost effective module for serial optical data communication applications to 10G. The PLGS1-98A/98B is designed to XGSPON OLT. They support various service scenarios and multiple types of network construction, including home and enterprise access. 95Gbps and Burst Mode RX rates of 9. With an operational temperature range of 0 to 70°C and a 3.

XGPON OLT SFP+ Class E2 20km DDM SC SMF Optical

Description The XGPON OLT SFP+ transceiver provides an asymmetric 9.953Gbps downstream and 2.488G upstream, reaching a link up to 20km over SMF via SC/UPC connector. It is fully compliant

Optical module design resources | TI

Design requirements Modern optical module designs often require: Reduced power consumption to control and limit module temperature rise. Dynamic and precise control of laser diodes to regulate
