Fiber Optic Continuous Fast Connector

Overview

OMC's FTTH fast connector is designed for quick and efficient installation. A Fiber Optic Fast Connector is a revolutionary component in the telecommunications industry, designed to simplify the process of terminating fiber optic cables in the field. As the world's demand for faster, more reliable data transmission skyrockets, the need for efficient network installation. A fiber optic connector is a mechanical device used to align and join optical fibers, enabling light to pass through with minimal loss. Unlike fiber splicing, which is permanent, connectors allow for easy connection and disconnection of cables, making them ideal for maintenance and flexibility in. FASTConnect® field-installable connectors are factory pre-polished connectors that completely eliminate the need for hand polishing in the field.
