Galvanized Cable Trays for Structured Cabling

Overview

Hot Dip Galvanized (GI)Perforated Cable Trays are metal trays coated with a layer of zinc through the hot-dip galvanizing process. GI cable trays are designed to support and organize electrical cables and wiring systems, ensuring a neat and secure installation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Manufactured from high-strength steel and undergo arigorousgalvanization process, resulting in a product defined by its superior. Our cable management store features wholesale ladders, baskets and trays from leading brands and a network of Chinese manufacturing partners.
