Key Takeaways

The XL-21 and PVC DB boxes are common lighting distribution box models used in Zimbabwe for residential, commercial, and industrial applications. XL-21 Power Distribution CabinetThe XL-21 type low-voltage power distribution cabinet is widely used in Zimbabwe for lighting and power distribution in industrial, mining, civil buildings, schools, and government institutions. Key features include: Construction: Bent steel plates with welded angle steel, wall-mounted, single-sided front-opening design.

Protection: Equipped with air circuit breakers, fuses, contactors, and thermal relays. Voltage & Current Ratings: Suitable for single-phase and three-phase systems, voltage below 500V, load currents up to 630A, and auxiliary circuits at AC 220V or 380V. Operating Environment: Ambient temperature -5°C to +40°C, altitude up to 2000 meters, relative humidity up to 50% at 40°C.

Safety & Standards: Enclosure protection level IP30, compliant with IEC 60439-1 and GB7251. 1 standards. Maintenance: Front door exposes all internal equipment for easy access; can include operation buttons, indicator lights, and knife switch handles for power disconnection.

C Distribution Boxes (DB Boxes)For residential and smaller commercial lighting circuits, PVC DB boxes are commonly used: Function: Serve as the load center, distributing electrical power to subsidiary circuits and protecting each with fuses or MCBs. Components: Bus bars, fuse links, switches, residual current devices (RCDs), and space for wiring and fixtures. Advantages: Corrosion-resistant, lightweight, and suitable for indoor installations.

Applications: Ideal for lighting circuits, small appliances, and solar-powered systems in homes and offices.

Other Considerations

Availability: DB boxes can be purchased from local suppliers such as Electro Sales, Sona Solar, and Zimbabwe Building Materials Suppliers. Customization: Some models allow installation of indicator lights, timers, and additional protective devices depending on the building's electrical requirements. Compatibility: Ensure the distribution box matches the local electrical system type (IT, TN-C, TT) and frequency (50–60Hz).

In summary, for lighting distribution in Zimbabwe, the XL-21 steel cabinet is suitable for larger or industrial installations, while PVC DB boxes are practical for residential and small commercial setups. Both types provide reliable protection and distribution for lighting circuits.
