New and Large Span Cable Tray

Overview

Wide-span cable trays are an integrated, highly flexible cable support system when used in combination with the matching formed parts, covers and system-specific accessories. The large selection of materials and surface finishes means they can be used in a variety of ways, both. Wide-span cable ladders and trays guide control and power cables in industrial halls, production facilities and power plants or in plant and tunnel construction to exactly where they are needed – flexibly, reliably and absolutely safely. They are not only suitable for the overhead laying of indoor and outdoor cables in industrial and mining enterprises such as petrochemical. Different from normal cable trays, Large span cable tray has large supporting span with high loading capacities. Large span cable trays can be divided into ladder style, channel style, perforated style with galvanized, powder coated. Strong and durable large span cable trays designed for heavy-duty industrial and commercial electrical systems.
