Temporary Communication Tower

Overview

An emergency telecom tower is a portable, rapidly deployable structural solution designed to restore or establish temporary communication networks during crises or in remote areas with no existing infrastructure. Reliable, windproof and autonomous. Reliable connectivity anywhere!Tower Solutions' portable cell towers, otherwise known as cell on wheels (COWs), are mobile towers that host a variety of transceivers and other utilities to provide cellular, broadband, or line-of-sight communications. Aluma is a custom designer of aluminum towers with decades of proven reliable results. In addition to aluminum, Aluma Tower is proud to manufacture mast towers. Designed for heights up to 140 feet and capable of handling two tours per flat 25,000lbs per (SG30). Unlike permanent telecom towers built for long-term use, this specialized tower.
