Xiaomi Power Distribution Box Remote Control

Overview

Step 1: Open the battery cover of the Bluetooth remote control, remove the insulation film and install the battery (with the positive side up) and the battery cover.

Key Takeaways

The Xiaomi Power Distribution Box can be remotely controlled using Xiaomi's smart home apps or compatible smartphone remote apps, enabling full management of connected devices. Remote Control Options1. Xiaomi Home App (Mi Home) The primary method to control the Xiaomi Power Distribution Box remotely is through the Mi Home app, available for both Android and iOS.

Once the Power Distribution Box is connected to your Wi-Fi network and paired with the app, you can: Turn individual sockets on or off remotely. Set schedules or timers for connected devices. Monitor real-time power consumption.

Receive notifications for overloads or abnormal usage. 2. Smartphone Remote Apps While the Mi Home app is official, third-party apps can also provide remote control functionality for Xiaomi smart devices.

For example, apps designed for Xiaomi Mi Box or other smart devices allow: Touchpad navigation and device control. Voice commands for hands-free operation. Multi-device management if you have several Xiaomi smart devices.

3. Physical Remote Options Some Xiaomi smart devices support physical remote controls, though availability depends on the model. You can check online marketplaces like Amazon or eBay for compatible Xiaomi remotes that may work with smart power devices.

These remotes typically allow basic on/off control and may include preset timers.

Setup Tips

Ensure the Power Distribution Box is connected to the same Wi-Fi network as your smartphone. Use the Mi Home app to scan for the device and follow pairing instructions. Keep firmware updated to ensure compatibility with remote apps.

For third-party apps, verify that the app supports your specific Xiaomi device model.

Additional Features

Voice Control: If integrated with Xiaomi AI or Google Assistant, you can control the box using voice commands. Automation: Combine with other smart devices to create automated routines, such as turning off lights or appliances when leaving home. Energy Monitoring: Track energy usage per device to optimize consumption and reduce costs.

By leveraging the Mi Home app or compatible smartphone apps, you can achieve full remote control and monitoring of your Xiaomi Power Distribution Box, enhancing convenience and energy management.
