Zambia AI Computing Server

Overview

Zambia has signed a new agreement with Huawei to deploy AI and cloud technologies across the public sector. The partnership includes plans for a national AI data center and training for 5,000 ICT professionals by 2028. Through this National AI Strategy and Vision, Zambia seeks to lay the foundations to enable our country and region to take full advantage of this new revolution. Our aim is to ensure that the benefits brought about by this next wave of innovation reach all segments of Zambia's society. We also. Who will control Africa's AI infrastructure?

Foreign firms are building the continent's data centres faster than African states can build the power and policy to own them. LUSAKA — The question of who owns the computing power behind artificial intelligence is becoming an African one, as data. Vice President Dr. While this solution has been successfully deployed in other African markets, its launch in. In November 2024, the Ministry of Technology and Science launched the 'National Artificial Intelligence Strategy 2024-2026' (the “AI Strategy”). It prioritises human capital development, digital infrastructure, data.
